550.6 G4
v.46 pt.1

CONTENTS

JANUARY

Page

Correlation of the more important marine Permian sequences; by Charles Schuchert 1
Hypersthene granodiorite in Virginia; by A. I. Jonas 47
New genus of rodent from the Sespe Eocene; by Chester Stock 61
Theory of heat conduction applied to geological problems; by T. S. Lovering .. 69
Cambrian-Algonkian unconformity in western Montana; by Charles Deiss 95
Conodonts of the Glenwood beds; by Clinton R. Stauffer 125

FEBRUARY

Glacial features of the southern Okanogan region; by Richard Foster Flint 169
Hamilton group of central Pennsylvania; by Bradford Willard 195
Distribution of Ordovician altered volcanic materials and related clays; by G. Marshall Kay 225
Flora of the Pensauken formation in New Jersey; by Edward W. Berry and Alfred C. Hawkins 245
Newberry volcano of central Oregon; by Howel Williams 253
Faunal differentiation in the Upper Devonian; by George Halcott Chadwick .. 305
Chemung is Portage; by George Halcott Chadwick 343

MARCH

Geology and literature; by W. H. Collins 355
Pre-Cambrian life; by Percy E. Raymond 375
Geologic analysis of the gravity anomalies for the Black Hills–Bighorn–Beartooth region; by Rollin T. Chamberlin 393
Development of thrust faults; by Robin Willis 409
Stratigraphy and paleontology of the Dundee limestone of southeastern Michigan; by Charles Fernando Bassett 425
Geology of the west end of Ymer Island, East Greenland; by Arthur B. Cleaves and Ernest F. Fox 463
Lateral change of fauna in the Lower Pleistocene; by Thomas L. Bailey 489

APRIL

Differentiation in lavas of the Michigan Keweenawan; by T. M. Broderick 503
Sedimentary and petrographic analysis of the St. Peter sandstone; by George A. Thiel 559
Glacial erratics in Willamette Valley; by Ira S. Allison 615
Fiord-land of British Columbia; by M. A. Peacock 633

MAY

Basal Pennsylvanian transgression in the Ozarks; by C. L. Dake 697
Age of the schists of the South Valley Hills, Pennsylvania; by Benjamin L. Miller 715

Page

Highlands near Reading, Pennsylvania; an erosion remnant of a great overthrust sheet; by George W. Stose and Anna I. Jonas..... 757
Tully formation of New York; by G. A. Cooper and J. S. Williams..... 781

JUNE

Significance of gravity anomalies at stations in the West Indies; by William Bowie..... 869
Mineragraphy of the ores of Great Bear Lake; by D. F. Kidd and M. H. Haycock..... 879
Basaltic rocks in the Umpqua formation; by Francis G. Wells and Aaron C. Waters..... 961
Structure of the Queen Maud Mountains, Antarctica; by Laurence M. Gould.. 973
Erosion marginal to a plateau glacier; by O. D. von Engeln..... 985
Origin and evolution of rock fans and pediments; by John L. Rich..... 999

CORRECTIONS AND EMENDATIONS

Contributors to volume 46 have been invited to send corrections and emendations to be made in their paper, and the volume has been scanned with some care. Corrections and insertions are as follows:

Page 72, line 17, *for* K_1 and K_2 *read* k_1 and k_2.
" 80, figure 5, *for* 1500 *read* 2000, *for* 1750 *read* 2500, *for* 2000 *read* 3000, and *for* 2500 *read* 4000.
" 89, line 6, equation 16, delete the integration sign following $d\alpha$ in the first term.
" 89, line 11, equation 18, the second bracket term should read [I(c)+I(d)].
" 164, figure 38, *for venustus, read politus.*
" 168, figure 22, *for curvatus, read abundans.*
" 246, delete lines 3, 4, and 5, beginning the second paragraph with line 6.
" 311, add to Pelecypods, *Aviculopecten lautus ithacensis.*
" 312, line 14, delete *Schizobolus concentricus.*
" 313, several more transients are now known.
" 315, add to Gastropods, *Phragmostoma explanatum.*
" 316, under Plants, delete *Psilophyton princeps.*
" 316, five or six more Chemung species are reported down in the Ithaca.
" 317, about 35 other Hamilton species seem to continue into the true Ithaca.
" 320, add to Arthropods (?) *Paramphibius didactylus* and *P. tridactylus.*
" 325, add to Arthropods (diagnostic), *Pterygotus elleri.*
" 325, line 24, delete *Aviculopecten striatus; see* Transient list.
" 327, under Pelecypods, delete *Leptodesma mortoni; see* p. 328.
" 331, under Amphibians ?, delete *?Thinopus antiquus.*
" 331, add to Plants (diagnostic), *Lepidostrobus gallowayi.*
" 332, line 14, *Pararca* commences in Middle Devonian (*P. praecedens*); *Pararca sp.* is reported by Kindle from the Ithaca.
" 336, *Rhychospirina* (*Rhynchospira*) is a Lower Devonian genus.
" 339, footnote, *for* 1178, *read* 1179.
" 379, footnote 1, insert Ann. Soc. Géol. du Nord, before vol. 23.
" 396, 397, 398. The U. S. Coast and Geodetic Survey has recently recomputed the isostatic anomalies for stations 357 to 449 inclusive. The revised figures for stations 421 to 449 were received in time to permit corrections in the galley proof, but the new figures for stations 357 to 393 came too late to be substituted for the old values.
" 757, plate 52, caption, *for* Plate 76, *read* Plate 53.
" 764, figure 2, *for* Metztown, *read* Mertztown.
" 770, plate 53, caption, *for* Plate 75, *read* Plate 52.
" 889, line 12 from bottom, *for* (Pls. 61 and 62), *read* (Pl. 62).
" 898, line 14 from bottom, *for* (Pl. 67, figs. 3 and 4), *read* (Pl. 66, fig. 2).
" 899, line 19, *for* (Pl. 66, fig. 4), *read* (Pl. 65. figs. 3 and 4).
" 900, *for* UO_2 proportion . . , *read* UO_3 proportion . . .
" 909, last line, *for* (Pl. 58, fig. 1), *read* (Pl. 68, fig. 1).
" 922, *for* (Pl. 66, fig. 1), *read* (Pl. 75, fig. 1).
" 928, line 11, *for Unknown No. 3, read Unknown No. 2.*
